

Hansen The Collection

A Curated Collection of Premium Timber Flooring

Every beautiful
home begins with an
exceptional foundation

Hansen

A bright interior space featuring light-colored wood-look flooring. Large windows with dark frames on the left side offer a view of a garden with a stone wall and a large white planter. Sunlight streams in from the windows, creating long, warm shadows across the floor. A white pillar stands near the windows, and a framed picture is partially visible on the wall to the right.

Every home has a story.

Some homes are filled with the laughter of young children.

Some become places where friends gather around the kitchen long into the evening.

Some are quiet retreats, designed for rest and reflection.

Some are built with future generations in mind.

Every home tells a different story.

Every family lives differently.

Every floor serves a different purpose.

At Hansen, we believe exceptional flooring should do more than complete a room.

It should provide warmth beneath your feet.

Confidence for everyday living.

And timeless beauty designed to become part of your story.

Because the floor beneath you quietly becomes part of every memory your family creates.

Hansen

An aerial photograph showing a lush green forest on the left, separated by a fence from a large industrial lumber mill on the right. The mill features several large buildings with grey roofs and extensive stacks of raw timber and processed lumber in the foreground and around the facility. The scene is captured from a high angle, looking down at the landscape.

Who we are

Every beautiful home begins with an exceptional foundation. For generations Hansen has worked with timber.

We understand wood. Its warmth. Its beauty. Its enduring performance.

That deep understanding, together with our Scandinavian heritage, has shaped our standards by which we select every floor that carries the Hansen name.

Today we travel the world searching for premium flooring worthy of carrying the Hansen name.

If it doesn't meet our standards... It doesn't become part of our collection. When you choose Hansen, you are choosing more than a floor. You are investing in exceptional craftsmanship, innovation and confidence – creating spaces that will be enjoyed for decades to come.

An aerial photograph of a lumber mill facility. In the foreground, there are large stacks of cut logs. Behind them are several industrial buildings, including a large one with a grey roof and another with a corrugated metal roof. A parking lot with several vehicles is visible. The facility is bordered by a dense green forest. The text is overlaid on the right side of the image.

Our philosophy

Curated.

Authentic.

Innovative.

Enduring.

Every product in our collection has been selected for a purpose.
Every floor has earned its place.

Flooring is the one surface in your home that every member of the family experiences every day.

Children crawl across it.

Friends gather on it.

Pets sleep on it.

Life happens on it.

Choosing flooring isn't selecting a finish. It's choosing the foundation for how your home will feel for decades.

Chapter 1: Heritage Solid Timber

Crafted by nature. Perfected by time.

Some things become more beautiful with age.

There is something unmistakably special about genuine solid timber.

Every board is shaped by decades of natural growth, creating grain, texture and character that can never be replicated.

Unlike many materials, solid timber develops a richer story over time. It responds to the changing seasons, gains character through everyday life and can be restored for future generations to enjoy.

It is flooring chosen not simply for today, but for the decades ahead.

For those creating a forever home, nothing compares to the authenticity and permanence of genuine timber.

Heritage Collection Pillars

Authentic

Every board is unique.
Nature ensures no two floors
are ever the same.

Crafted

Produced from genuine
New Zealand hardwood, shaped by
generations of timber expertise.

Enduring

Able to be restored and enjoyed for
generations. Built to become part
of your family's story.

Timeless

Interior trends come and go.
Natural timber never loses its place.

For generations, Hansen has worked with timber.

Visit your nearest Hansen Certified Partner to experience the Heritage Collection firsthand.

Discover the Heritage Collection

Every species has its own personality.

Carefully selected to celebrate the beauty of genuine New Zealand Timber all while being milled and crafted within our mill in Clevedon, Auckland.

Eucalyptus Pilularis / Blackbutt

Tasmanian Oak

Australian Blackwood

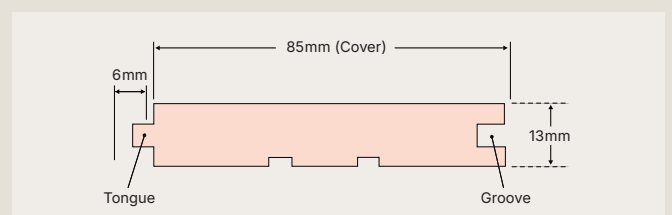

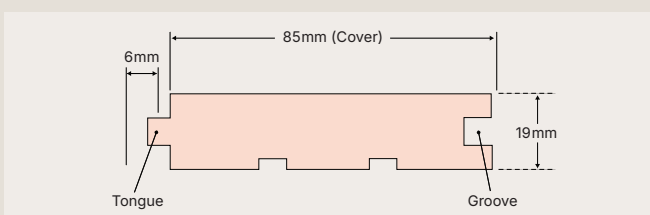

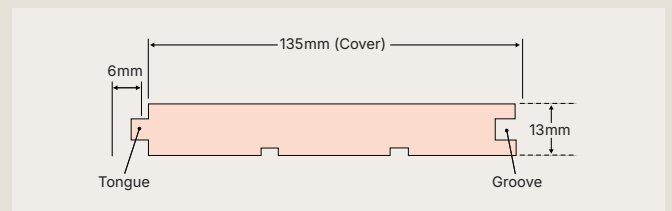

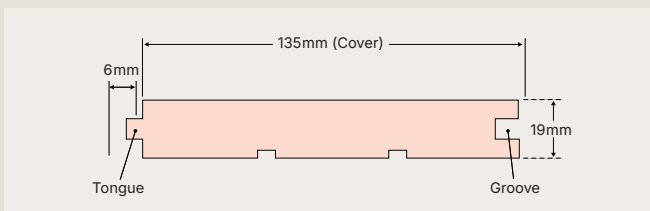

Eucalyptus Globoidea / White Stringybark

Macrocarpa

Eucalyptus Saligna / Sydney Blue Gum

Timber is a natural product and images shown are representative only.

General colour and grain is determined by the species, however there will be natural variations.

From tree to floor

The beauty of solid timber begins long before it reaches your home.

Selected

Genuine New Zealand Grown Timber selected for its character and suitability.

Milled

Precision machinery transforms the timber into flooring boards.

Dried

Timber is carefully prepared and dried before processing into flooring.

Crafted

Each board is precisely profiled and prepared – all made in Clevedon from start to finish.

Some things take time

Natural timber cannot be rushed.

From the preparation of the raw material through to milling and finishing, every stage contributes to the performance, character and longevity of the finished floor.

That's why flooring shouldn't be an afterthought.

For new builds and renovations, we encourage homeowners, architects and designers to talk to Hansen early in the planning and specification process.

The right timber.

The right profile.

The right finish.

The right time.

Start with the floor

Talk to Hansen during the planning stage
– before the build is underway.

**Unlike many materials, solid timber
tells the story of the home it lives in.**

It gathers memories rather than simply
showing wear.

The quiet marks of everyday life become
part of its character.

Years from now, it can be restored, renewed
and appreciated by another generation.

That is the beauty of genuine timber.

It was never designed to be temporary.

Chapter 2: European Engineered Oak

Timeless design never asks for attention.
It quietly earns it.

For centuries, European oak has been chosen for some of the world's most enduring homes and interiors.

Its subtle grain, natural warmth and understated elegance have made it one of the most admired flooring materials in architecture and interior design.

At Hansen, we have carefully curated a collection of premium German-manufactured engineered oak flooring that honours this tradition while embracing the performance expected in modern New Zealand homes.

Every board reflects generations of European craftsmanship, precision engineering and thoughtful design.

The result is flooring that feels as relevant decades from now as it does today.

Because true design is timeless.

Timeless

A material that
never dates

Natural

Every board tells
its own story

Balanced

Complements minimalist
and traditional
interiors alike

Architectural

Chosen by designers
because it never
overwhelms a space

Crafted

German precision.
European heritage

Enduring

Beauty that lasts
well beyond
changing trends

The image shows a detailed texture of a wooden surface. The grain is predominantly vertical, with subtle variations in tone from light tan to a slightly darker, warm beige. Several knots are visible, including a prominent one in the lower-left quadrant and another near the top center. The lighting is even, highlighting the natural imperfections and organic patterns of the wood.

Nature never repeats itself

The Collection

At Hansen, we believe a beautiful floor should do more than complete a room – it should become part of the home's story for generations to come.

Our Engineered Oak Flooring Collection has been carefully selected from leading European manufacturers renowned for their precision engineering, quality craftsmanship and timeless design.

Every board reflects generations of woodworking expertise, combining authentic European oak with advanced manufacturing techniques to create flooring that is both beautiful and built to last.

Designed for New Zealand homes, each collection offers outstanding dimensional stability, exceptional quality and the natural warmth that only genuine timber can provide.

This is flooring for those who appreciate authentic materials, refined interiors and enduring quality.

Because timeless design never needs replacing.

Some materials never need reinventing

Germany has long been recognised for precision manufacturing and engineering excellence.

The European oak flooring selected by Hansen combines authentic timber with advanced manufacturing techniques to deliver exceptional dimensional stability, refined finishes and lasting performance – qualities that have earned German craftsmanship a global reputation.

Chapter 3: LINDURA Engineered Oak

Built for life – crafted from nature as luxury shouldn't be fragile.

**Beautiful timber flooring should be enjoyed
every day – not protected from everyday life.**

For generations, homeowners have had to choose between the beauty of real timber and the durability required for everyday life. Now they don't have to.

Hansen introduces LINDURA – an advanced Luxury Engineered Oak flooring solution that combines the warmth and authenticity of genuine European oak with innovative surface technology designed for modern New Zealand homes and commercial spaces.

Whether it's children racing through the hallway, pets running indoors, or the demands of everyday family living, LINDURA is engineered to withstand life while retaining the timeless elegance of real wood.

Because luxury shouldn't be fragile.

**Luxury engineered Oak flooring
built to withstand modern life.**

The hardened timber surface enhances durability while preserving the natural beauty, texture and warmth of real European oak.

Excellent water resistance for everyday living, outstanding dimensional stability and superior scratch resistance make it ideal for premium residential and commercial interiors.

LINDURA is genuine European oak flooring engineered for enhanced resistance to water, dirt, dents and scratches, thanks to:

1. **Wood Powder Technology:** Real wood wear layer, wood powder and high-grade resins fuse together to form an extremely resistant surface composite. The genuine wood experience is preserved, visually and haptically.
2. **Duratec or Weartec® Nature:** The highly advanced surface technology with extra pore protection is available in oiled and lacquered versions.
3. **AquaStop Edge + 5G DRY® Locking method:** LINDURA HD 400 combines a water-resistant surface with AquaStop edge impregnation along with the patented 5G DRY® Locking method to help protect the flooring against moisture.
4. **Dent and Scratch Resistant:** Real European oak, reinforced with advanced surface technology that helps protect against dents, scratches and everyday wear that naturally occur in a busy home.

1 Ultra Matt Lacquer Duratec Nature or Natural Oil Weartec® finish surface

2 Real wood veneer layer

3 Wood powder layer made of wood powder and high-grade resins

Chapter 4: Living Stone Flooring

Practicality should never come at the expense of style.

Designed for real life.

Beautiful interiors need beautiful foundations
– but some spaces demand more from their flooring.

Living Stone combines the visual warmth of timber with the practical performance modern homes require. Waterproof, durable and designed for everyday living, it offers the freedom to continue a consistent flooring aesthetic throughout the home – including kitchens, bathrooms and laundries.

With realistic timber tones and refined contemporary finishes, Living Stone brings together design and performance in one considered flooring solution.

Practical where it matters. Beautiful everywhere.

Performance without compromise

Waterproof

Designed for use throughout the home, including moisture-prone areas such as kitchens, bathrooms and laundries.

Durable

A robust flooring solution designed to withstand the demands of everyday residential and commercial environments.

Acoustic Comfort

An integrated acoustic underlay is pre-installed beneath every plank, helping create a more comfortable flooring experience.

Easy Installation

The patented Uniclic® drop-and-lock installation system provides a practical and efficient installation method.

Slip Resistant

A considered surface designed to provide practical performance for the demands of everyday living.

Versatile Application

Designed for modern residential and commercial interiors, from busy family spaces to contemporary commercial environments.
